

SAAH BRUNO NCHITU

Senior Data Analyst

*contact@brunodatainsights.com | <https://www.brunodatainsights.com>
NKWEN BAMENDA, NORTHWEST REGION, 00000, Cameroon | +237652499571*

A detail-oriented and Results-driven Data Analyst with expertise in Power BI, SQL, Tableau and Python for data analysis. I am skilled in data modeling, ETL, predictive analytics, and dashboard design to drive strategic insights, optimize performance, and enhance decision-making for business growth. Exhibited committed approach in leading a team of junior data analysts, meeting project deadlines on time and within budget. I am a highly qualified, goal-oriented IT professional with extensive problem-solving skills. Experience working with high profile customers, both internally and externally, and have excellent verbal and communication skills. Great hands-on experience working with multiple data platforms and tools.

Work Experience

Data Analyst

Aug 2023 - Present

JoinIT Solutions LLC | Texas

- Led enterprise-wide data initiatives by developing Power BI dashboards that improved business decision-making and reduced reporting time by 40%.
- Implemented innovative data visualization techniques to present complex data in a clear and concise manner leading to actionable business insights
- Designed and optimized complex DAX calculations to track key financial and operational KPIs. - Developed automated ETL pipelines using Power Query and SQL, improving data refresh efficiency by 30%.
- Managed and interpreted complex data sets using data analytics, resulting in actionable insights to drive business decisions.
- Applied Business Analytics techniques to interpret complex data sets, leading to actionable business insights into the capacity of a Senior Data Analyst
- Provided accurate Financial Forecasting analysis to identify key trends, risks and opportunities for the business.
- Published reports to Power BI Service, managing datasets, reports, and dashboards for seamless collaboration.
- Administered Power BI Service, managing workspaces, dataflows, and Power BI Apps for streamlined deployment.

- Configured and implemented Row-Level Security (RLS) to ensure secure data access for different user groups.
- Created interactive dashboards and paginated reports for enterprise-wide distribution via Power BI Apps.
- Managed, organized and analyzed large and complex datasets using advanced data management techniques within the financial services industry, with a detail-oriented approach, ensuring accuracy and integrity of all data points.
- Monitored Power BI performance, optimizing report load times and ensuring efficient data refresh schedules.
- Worked closely with IT teams to maintain and optimize the company's Data Warehouse, ensuring accuracy and efficiency in data retrieval.
- Managed multiple data analysis tasks concurrently, demonstrating exceptional Flexible abilities in adapting to shifting priorities.

Data Analyst

May 2021 - July 2023

Bayelle Cooperative Credit Union Ltd | Nkwen Bamenda

- Designed and developed interactive dashboards in Power BI, enabling executives to monitor KPIs, trends, and operational insights in real-time.
- implemented a robust system for data collection, processing and analyzing large datasets of financial data, these ensured accuracy and data integrity of datasets used in high-level business analyses.
- Transformed raw data from multiple sources (SQL, Excel, APIs, cloud databases) into structured datasets for advanced analytics and reporting.
- Created and optimized calculated columns, measures, and advanced DAX expressions to drive dynamic data analysis and performance efficiency.
- Implemented Dynamic Row-Level Security (RLS) in Power BI Service, ensuring secure data access based on user roles and organizational hierarchy.
- Optimized Power BI reports and dashboards by improving data model efficiency, reducing query load time, and enhancing report interactivity.
- Worked closely with stakeholders across departments (Finance, Sales, Marketing, and Operations) to define reporting requirements and deliver actionable data insights.
- Utilized financial modeling and advanced Analytics Tools to analyze and predict revenue trends, resulting to an increase in profits.
- Applied business intelligence tools to analyze, interpret, and predict key metrics resulting in actionable insights for decision making
- Automated report generation and scheduled refreshes in Power BI Service, ensuring timely and up to date insights for business users.

- Developed data-driven reports and dashboards to support decision-making across sales, finance, marketing, and operations teams.
- Implemented improvements in the accuracy of financial operations through meticulous data analysis, significantly reducing errors and discrepancies.
- Utilized Performance Analytics to identify trends, patterns, and opportunities for business growth
- Wrote complex SQL queries and ETL scripts to extract, transform, clean, and analyze data from relational databases, cloud storage, and other data sources.
- Conducted ETL audits to identify and resolve complex data queries and ETL scripts to extract, transform, clean, and analyze data from relational databases, cloud storage, and other data sources.
- Implemented comprehensive risk assessment strategies to identify potential data threats and vulnerabilities, leading to a 25% decrease in security incidents

Education

JoinIT Solutions Texas || University of Buea College of Technology

Aug 2024 - Mar 2025

Certificate MICROSOFT POWER BI DATA ANALYST ASSOCIATE

JoinIT Solutions || College of Technology

Jan 2024 - Dec 2024

Certificate MSSQL SERVER DATABASE ADMINISTRATION

University Of Buea

Oct 2014 - Aug 2018

Bachelors ACCOUNTING
